

# Toadstool Doorstop

from [madewithlovebyhannah.com](http://madewithlovebyhannah.com)

you will need:

fabric for cap & base

cardboard

stuffing

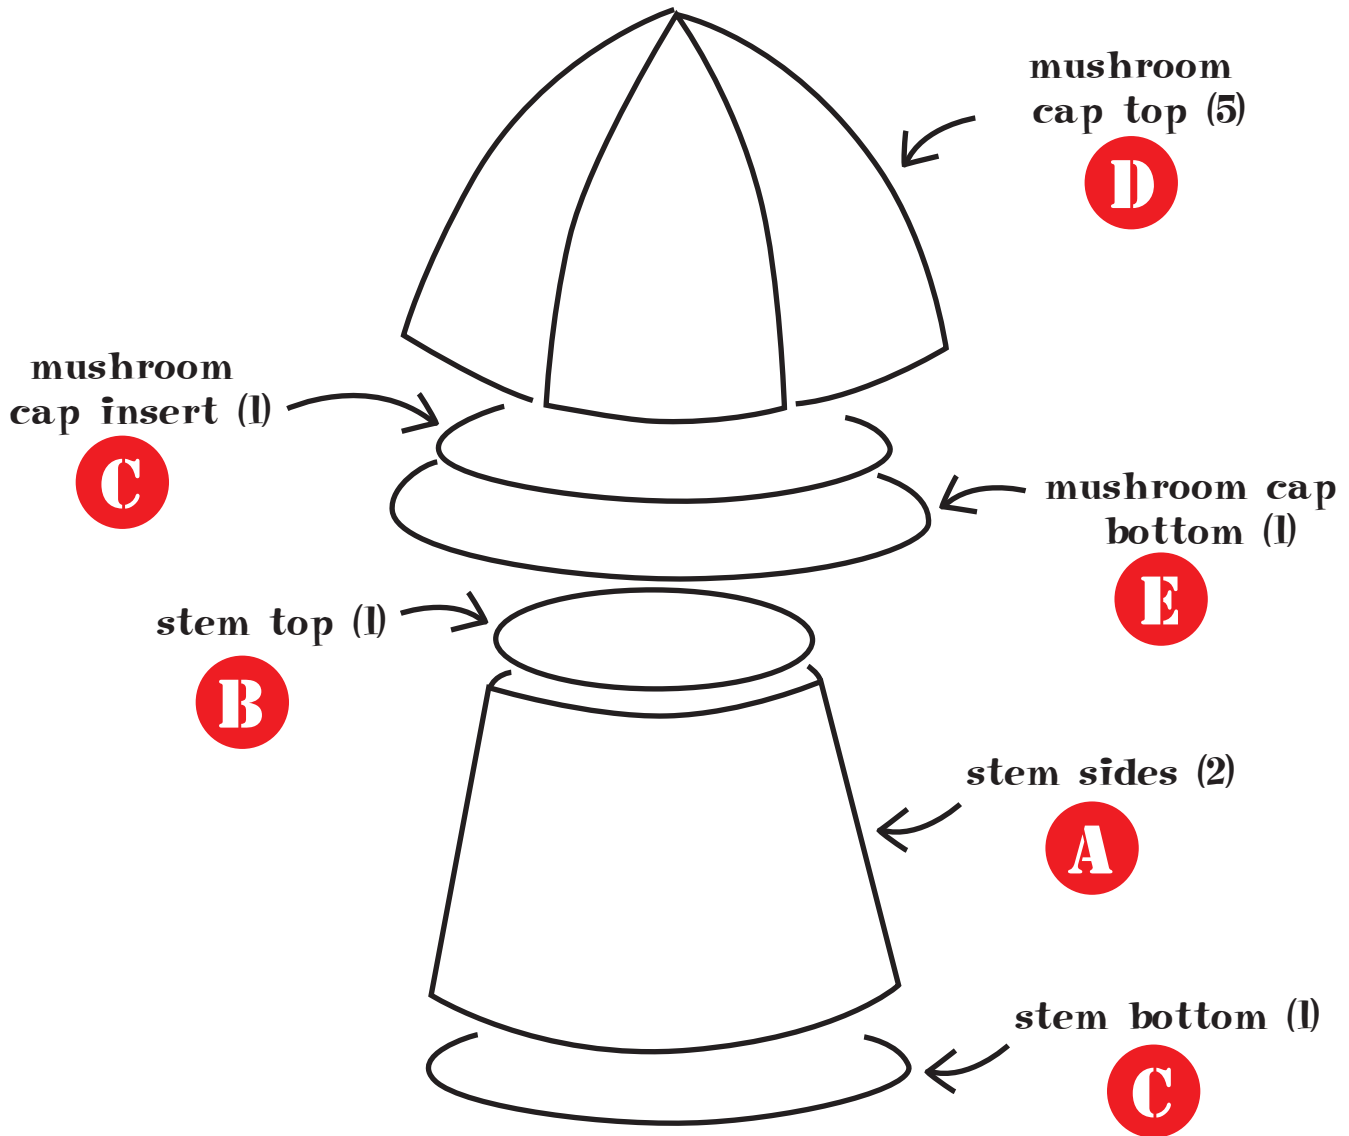

cute trim

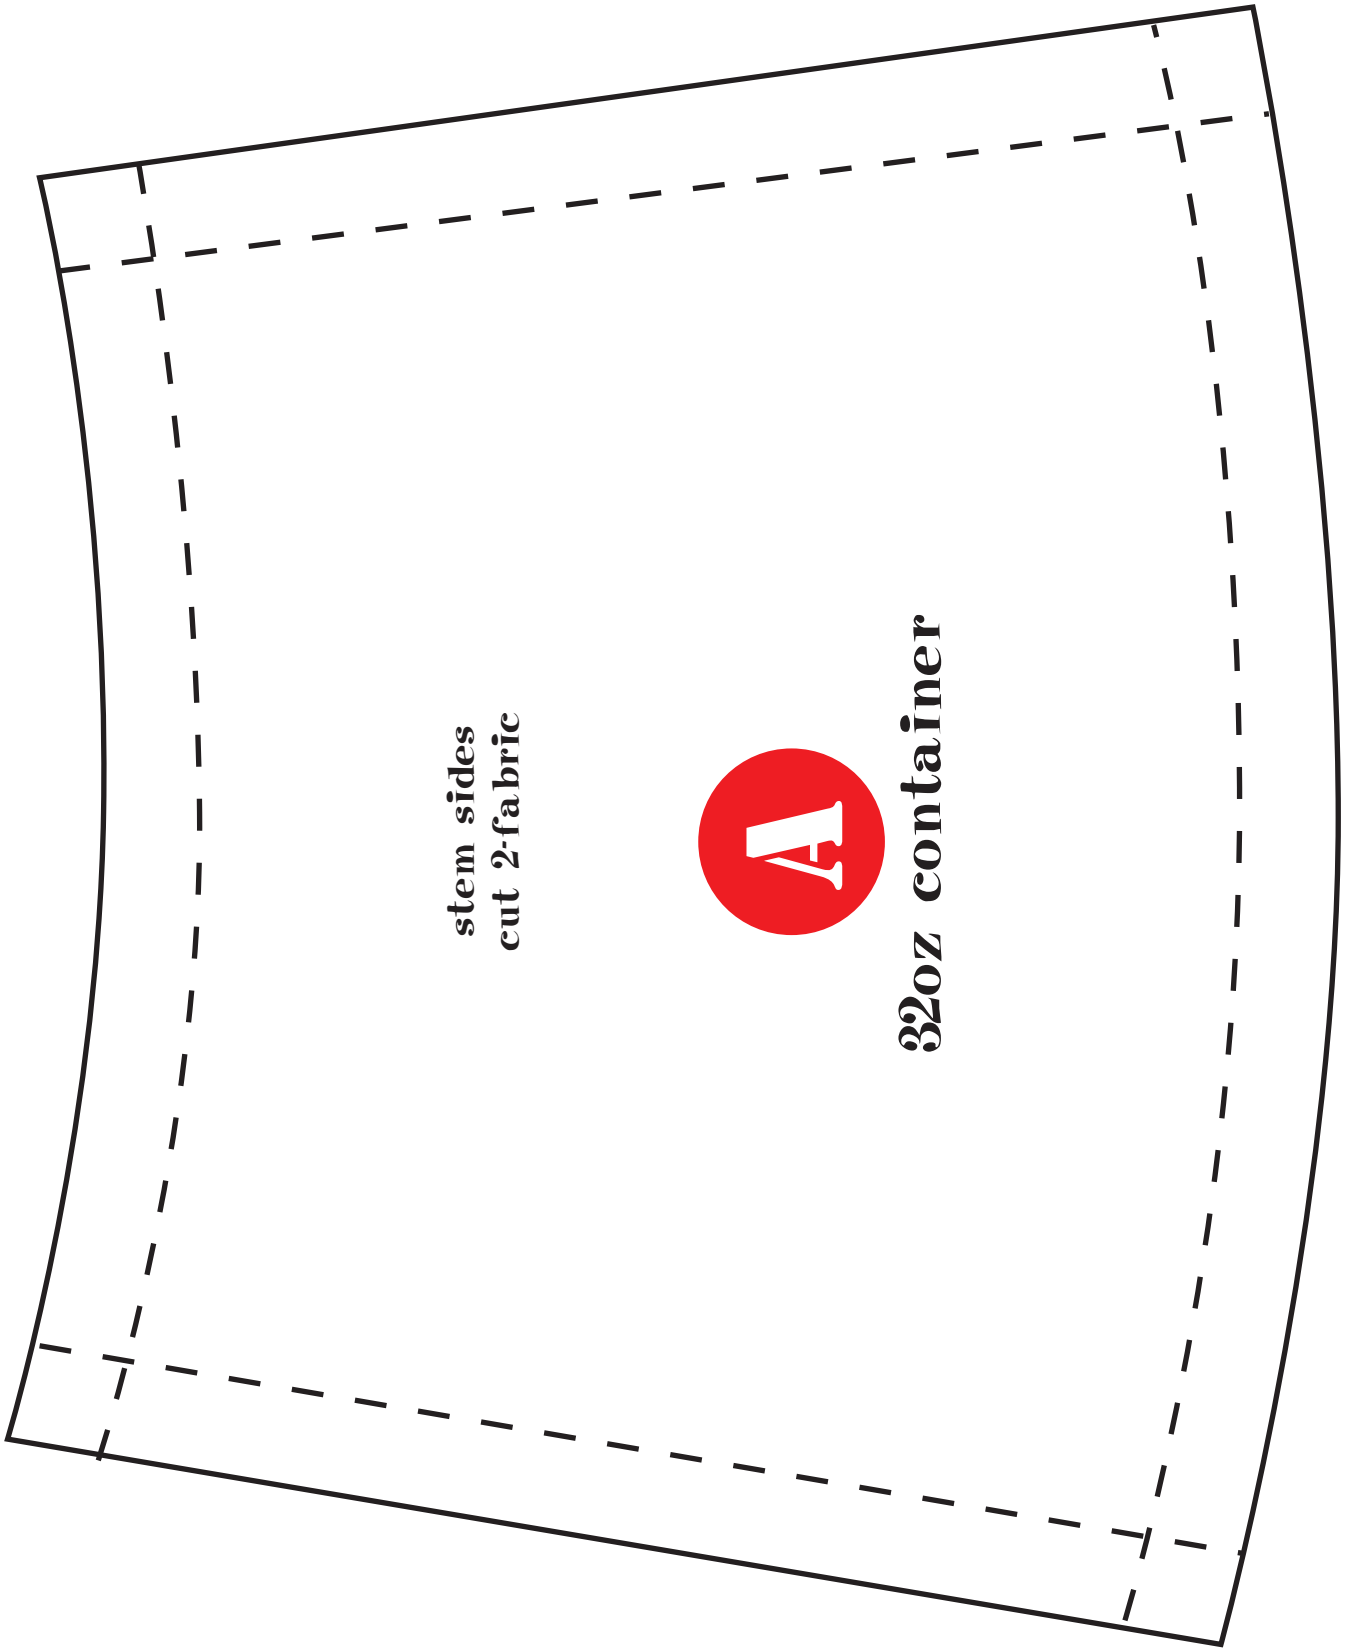

32oz yogurt container or 16oz earth balance

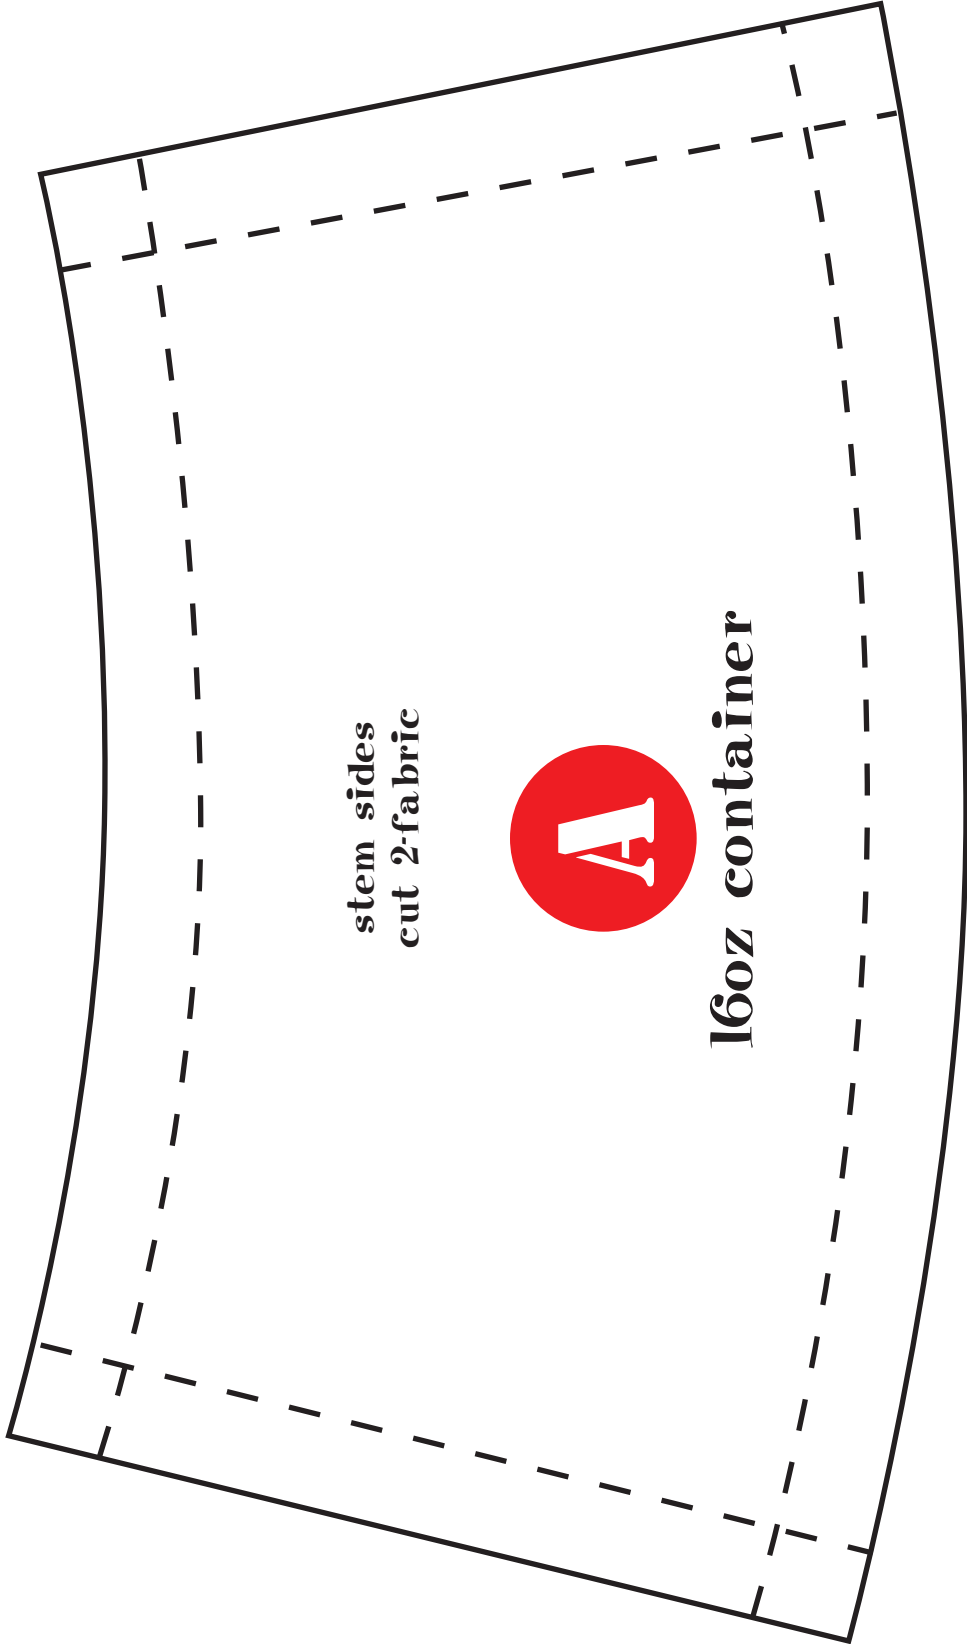

or similar shaped container filled

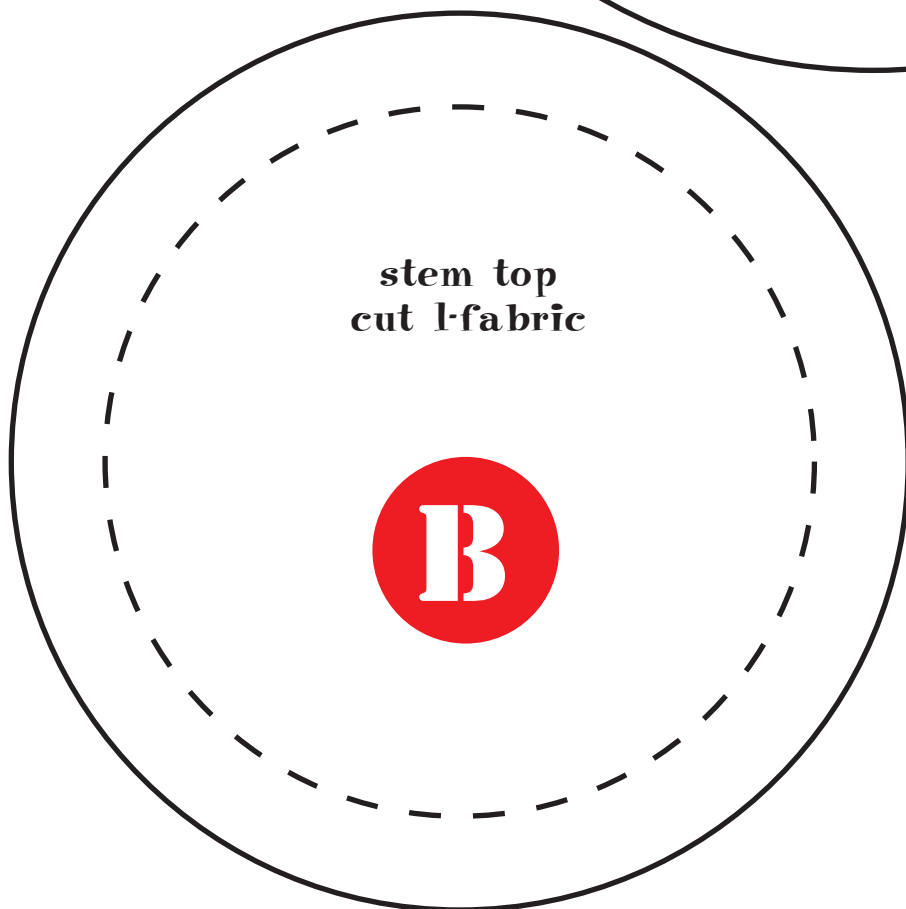

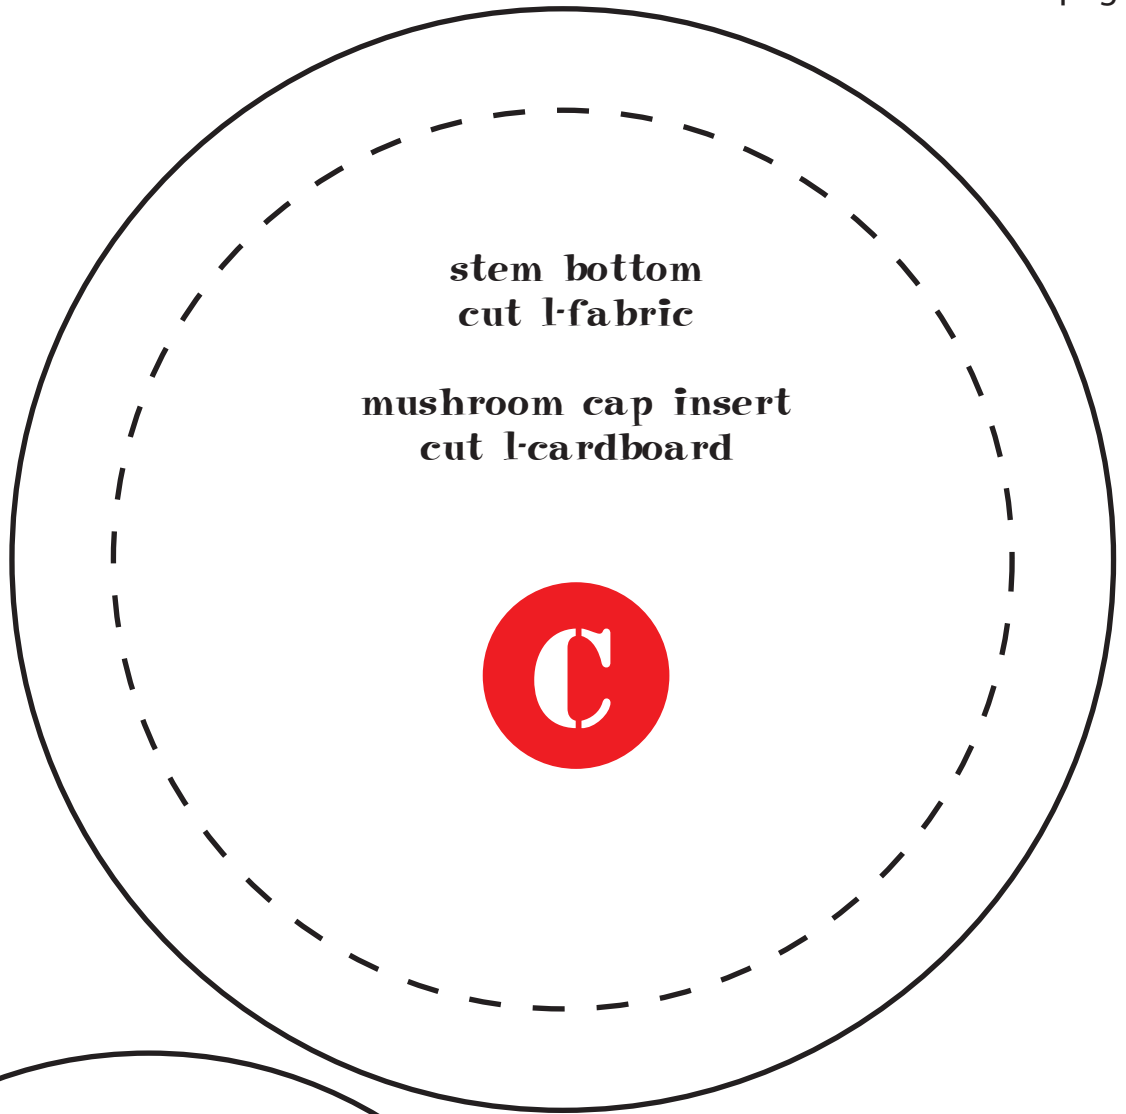

with gravel or sand

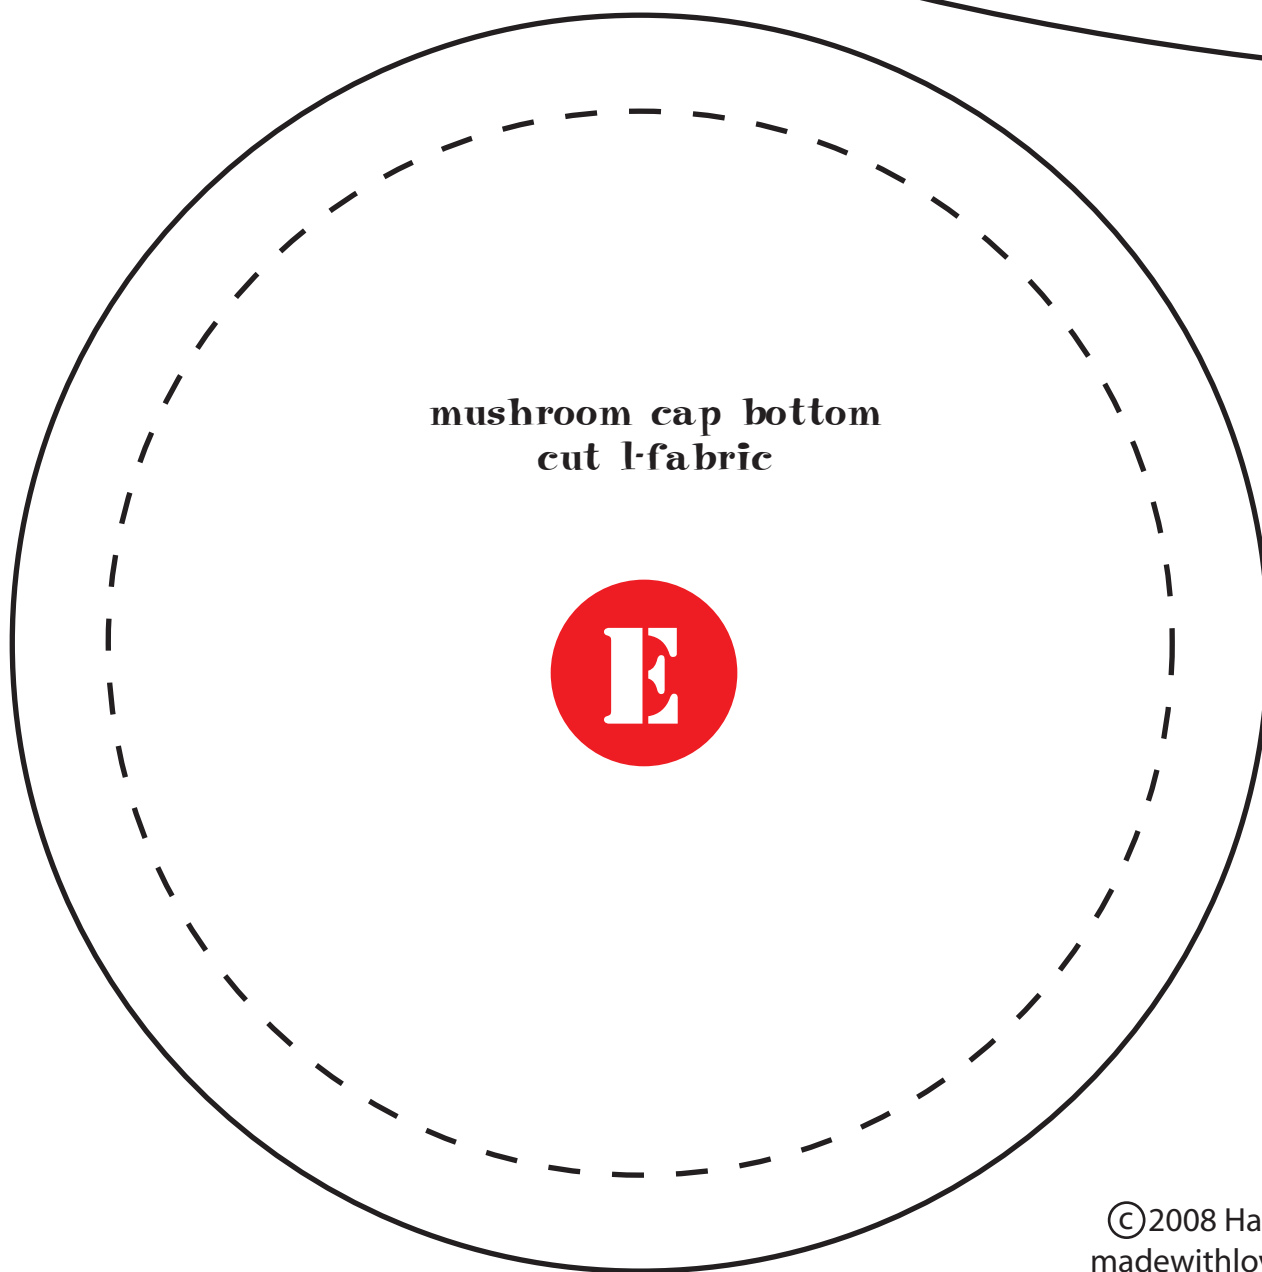

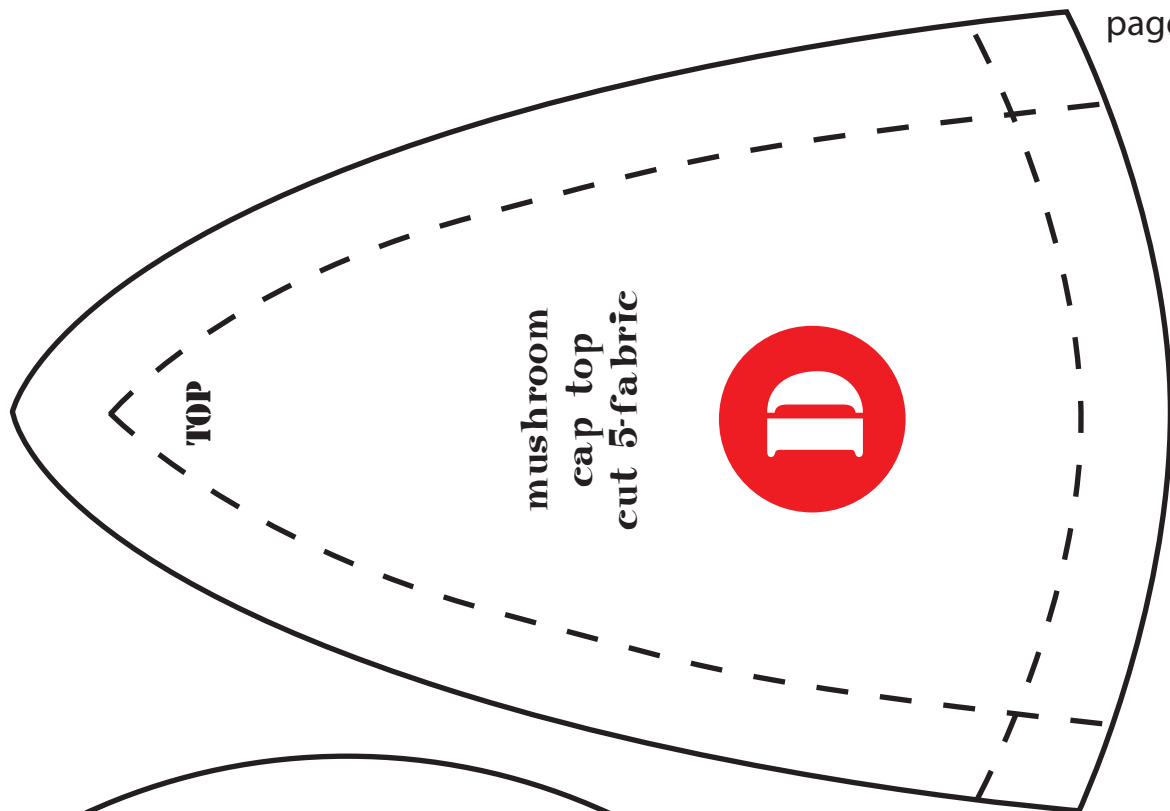

pattern pieces have a 1/2 inch seam allowance

first fill the container with something heavy, i used gravel but sand or rocks would work well too. put on the top and tape it on securely.

sew the stem sides (A) together on both sides, then sew on the stem top (B). turn right side out and insert your container. pin the stem bottom (C) on and stitch by hand.

sew the 5 cap pieces (D) together, meeting together at the top. then sew the cap bottom (E) on a little more than half way around, leave about a 6-7 inch opening.

turn right side out, and insert the cardboard piece (C) so it sits inside at the bottom of the cap. stuff the cap. sew up the opening by hand.

glue the top to the base.

glue some cute trim around the edge of the cap and some ric-rac 'grass' around the bottom!
